KAMLESH BAMBARDE

SOLUTIONS ARCHITECT

PROFILE

Solutions Architect with robust experience in architecting solutions for application modernisation in complex cloud/multi-cloud/on-premises environments. An Innovative thinker who has successfully architected several transformations of complex legacy applications to micro-services based serverless solutions. Additionally, architected solutions for multi-channel web applications, mobile based applications with cloud native backend services.

Astute problem solver with a track record of addressing the challenges such as niche technologies, reverse engineering, grooming & coaching teams on emerging technologies. Additionally, undertaken assessment of enterprise applications to provide recommendations on re-hosting to cloud environment.
